# Exterior Features

Timeless style, premium components, and a hand-made process that’s been perfected over the course of more than 90 years. While the interior of Globetrotter is a design-enthusiast’s dream, the exterior preserves the iconic riveted aluminum silhouette that has called to generations of travelers. Inspired by Airstream founder Wally Byam’s mid-century European caravans (which led to the original Globetrotter line in the 1950s), today’s Globetrotter captures the spirit of adventure and the tradition of European design in a travel trailer that’s built by hand here in America’s heartland.

# How It's Made

Informed by more than 90 years of quality craftsmanship and expert design, Airstream travel trailers are hand-made in Jackson Center, Ohio. Only the best materials are used – from seamless, waterproof composite flooring, to the hardware and finishes we use to build our cabinetry, to the rivets and aluminum that form the shell. In building our world-famous travel trailers, we rarely do things the easy way. That’s why an Airstream travel trailer can last a lifetime – or more – and be passed down from generation to generation for years of enjoyment.
